

We at Weldlok® are excited to share with you the great things happening here.

STATING OUR CAPABILITIES

Since its introduction into Weldlok® in the early 1970's, Balltube® Industrial Handrail Systems including Balltube® Stanchions have become renowned across Australia for quality and durability. Balltube® products are available in a variety of materials including galvanised mild steel, stainless steel and aluminium.

The Weldlok® Balltube® Handrail System is designed and manufactured to comply with Australian Standard AS1657-2013.

With impressive facilities in Yagoona, NSW and Belmont, WA our products are manufactured by a highly skilled workforce making Weldlok® the leading supplier of this wide range of fabricated handrail products in the Australian market.

With the ability to take on projects of any size and complexity, Weldlok®

has made a resolute commitment to provide its customers with the product they want, delivered on time and in full. This is made possible by the robust system which Weldlok® has adopted ensuring fast quotation processing, accurate interpretation of drawings and CAD files provided by customers and most importantly the commissioning of advanced automated machines including a CNC pipe bender and grating plasma profiler.

PRODUCT RANGE REVIEW - BALLTUBE

APPLICATIONS

Because it is available in a variety of materials, our Balltube® range is suitable for many different applications. We have supplied Balltube® into projects across Australia including mining; industrial, chemical and sewage plants; marine environments including superstructures and drill rigs as well as architectural projects and tourist sites.

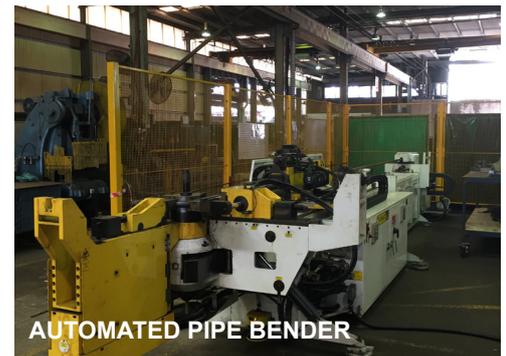

EASY INSTALLATION

The Balltube® Handrail System sets the standard for time and cost saving in the installation of walkways, stairs and ladders. Components delivered to site include fully galvanised

stanchions, rails, bends, kick-plates, slip-joints and closures. All ready for trouble-free installation. The modular Balltube® system allows speedy erection and finishing, with a minimum of on-site welding, providing considerable savings in time and therefore cost.

COMPLETE PACKAGES

Weldlok® can supply a total package including Balltube® handrail and Forgebar® grating, stair treads and walkway modules. Our team can provide advice to engineers, fabricators, specifiers and draftspersons in the correct selection of all our products.

WE RELY ON YOUR FEEDBACK

Customer feedback is an essential part of our continuous improvement journey and we appreciate all the feedback we get, both positive and negative.

‘At the heart of our culture is the belief that to be of service is an honour.’
