

We at Weldlok® are excited to share with you the great things happening here.

PRODUCT CERTIFICATION STATEMENT

The purpose of product certification is to provide independent assurance of the claim by the manufacturer that products comply with the applicable Standard.

The certification scheme shall meet the criteria described in SA/SANZ HB 18.28 (ISO/IEC Guide 28) in that, as well as full type testing from independently sampled production and subsequent verification of conformance, it requires the manufacturer to maintain effective planning to control production.

The certification scheme serves to indicate that the products consistently conform to the requirements of this Standard.

At Weldlok®, we produce two types of product certification for the Civil Drainage product range, Type Test Report & Sample Batch Release Test Report through our NATA accredited load testing facility - Accreditation No 12043. This way we make sure that we comply with all related Australian Standards and various Road Authorities' design criteria.

PROJECT SNAPSHOT - WANDARRAH RESERVE, MT ANNAN NSW

Our team at Weldlok® work tirelessly with our customers to provide products and solutions that would match their specific needs. An example of this is the service that Nora Jordan – NSW Account Manager has recently provided to Camden Council - NSW. A specially designed pit grate manufactured by Weldlok® to the highest quality has proven just that. Camden Council's Works Coordinator – Infrastructure Services, Mr. Greg Woodhouse praised the work by Weldlok®. Here is what Mr. Woodhouse said about us: *"The customer service you provided for the supply and manufacture of the grate at Wandarrah Reserve, Mt Annan was first class. This grate has now been installed and the grate fitted to perfection. Camden Council would not hesitate to use you and your products in the future."*

We ask our valued customers to trust us with all of their important, quick and difficult jobs. We are experienced and well equipped with the latest machinery such as pipe bending machine and plasma cutter to manufacture the best quality products including Steel Grating, FRP Grating and Civil Drainage Grates, Industrial Handrail, Expanded & Perforated Metal Mesh.

FASTCLAMP MODULAR STRUCTURES & GUARDRAIL FITTINGS

Fastclamp® from Weldlok® is a range of fittings manufactured from galvanised malleable iron offering another way of constructing guardrails, safety posts and other structures. Fastclamp® fittings require no welding, drilling or special tools. Simply use a hexagon key to tighten the special setscrews that embed into the tube.

Exclusive Offer*

FastClamp®

Mention the Weldlok Newsletter when purchasing Fastclamp fittings and receive a **20%** discount on your current pricing.

*Offer valid during February 2017. Available for stocked fittings only.

WE RELY ON YOUR FEEDBACK

Customer feedback is an essential part of our continuous improvement journey and we appreciate all the feedback we get, both positive and negative.

‘At the heart of our culture is the belief that to be of service is an honour.’
